

RobMation GmbH®

CNC, Robot and more

**Individualized cooling lubricants for every processing
- sustainable thinking in all process -**

Your Turn Key Solution Provider

RobMation GmbH®

CNC, Robot and more

	MATERIAL				PROCESSING			CHEMISTRY			
	Alu	Cast Iron	Steel, stainless-steel	Non-ferrous steel	Light	Heavy	Grinding	Synthetic	Free of Bor	Free of Amine	Free of Formaldehyde
RobSol® Grind 70		x	x		x		x		x		x
RobSol® Alu 100	x	x	x			x			x		x
RobSol® Grind A80	x	x	x		x		x		x	x	x
RobSol® Steel 1000	x	x	x			x			x	x	x
RobSol® Steel 110	x	x	x	x		x			x	x	x
RobSol® Grind 4030		x	x				x		x		x
RobSol® Alu 90	x	x	x			x					
RobSol® BM 90		x	x	x	x						
RobSol® Steel 40		x	x	x		x		x	x		
MACHINE CLEANERS											
RobSol® Clean 1000											
RobSol® Clean 3000											x
OILS											
RobSol® H32	Hydraulic oil										
RobSol® G68	Slideways oil										

RobSol® is an important and not negligible partial process in machining. For the quality and precision in machining and the related unit costs, it is important to ensure longer tool life for tools and cooling lubricants. This applies to all synthetic, semisynthetic and soluble **RobSol®** cooling lubricants.

Advantages of the competition:

- Adaption of the cooling lubricant for the water quality used through our laboratory
- better dripping behavior, thus less carry-over / discharge of cooling lubricant over the components
- the KSS fleet is optionally monitored and logged as part of a maintenance contract
- Guaranteed functionality in conjunction with RobMation TurnKey solutions (chip conveyor and central processing equipment, cleaning equipment)

We have solutions for every industry and every machining process.
